

# UNLEASHING THE TIGER

The Tiger Bolt System is a genuine "one pass", permanent resin system able to be installed with standard Jumbo drills.

Manufactured from high strength steel tube, the bolt is provided with an Oz drive nut, collar and destructible cardboard resin holder which contains a "Two Speedie" resin capsule

The final result is a fully encapsulated, pre-tensioned, permanent support, with a protruding threadbar tail able to be used for purposes such as post meshing, hanging brackets, services and pull testing.
